

## Was 2017 a great year?

2017 has been a successful year, my first taste of success was back in May. I wrote about [Hutchinson Builders tower cranes](#) dominating Brisbane's skyline. The article was received so well that it would go on to become my most read article of 2017.

## 2017 a series of firsts for The Travelling Builder

My first interview was with Heath from Heath Nicholson Builders about their [Round House project](#).

And the first filmed interview for The Travelling Builder Show goes to Kevin from [True Blue Building Solutions](#). Kevin and his smart toilets would be the most viewed episode of the series with over 1700 views.

Following on from Kevin, I was able to interview Donna from [Colour By Design](#), Jim from [Starbuck Excavations](#), Heath from [Heath Nicholson Builders](#) and Ken from [Bread Builders](#).

## 2017 stand out companies

Stepping away from the screen, the standout companies I have written about would be Holly and Marc from [Clem carpentry](#) and Rou from [Fix It Up Shopfitting](#).

As the year progressed, against good advice, I followed my heart and went on a hike. That hike had me walking my way around Melbourne taking photos of [Raimondi tower cranes](#).

That one excursion has opened a countless number of doors and international recognition for [The Travelling Builder](#).

And now here we are a few days into what is already shaping up to be a massive 2018. This year will see The Travelling Builder go from a small blog to a leading, reputable media outlet for the construction industry.

Thank you so much for being a part of The Travelling Builder's journey in 2017. I wish everyone a prosperous and happy 2018.
